

WORKTOP ON CABINETS

Base laboratory cabinets, in which the height of furniture varies according to the height intended for the benches. The laboratory furniture is used for storing equipment and storing chemical substances in accordance with EN 14727.

Safe storage and organization is one of the most important requirements in a laboratory. And the best location for such is precisely close to the work surface, although space is often reduced. In this sense, Industrial Laborum has designed base cabinets, with several standard dimensions, maximizing the work area. They serve as support for countertops, for the storage of permanent use material or for active storage.

All furniture is designed individually but always integrated into a modular system. In this process, other criteria are also considered:

- Maximum storage space;
- Easily cleaned and decontaminated surfaces;
- Maximum security;
- Greater mobility and adaptability
- Chemical, impact and abrasion resistance;
- Care in the constructive details and finishings;
- High structural and dimensional stability;
- Protection and/or reinforcement of fragile points.

Furniture with **SEFA 8** certification, designed and manufactured according to **EN 14056** - Laboratory Furniture - Design and Installation
Recommendations; **EN 14727** - Laboratory Furniture - Storage Units for

TAMPO SOBRE MÓVEIS

Móveis inferiores de laboratório em que a altura varia de acordo com a altura pretendida para as bancadas. O mobiliário de laboratório é utilizado para arrumação de equipamentos e armazenamento de substâncias químicas, em conformidade com a norma EN 14727.

A arrumação e organização em segurança são um dos requisitos mais importantes num laboratório. E a melhor localização para tal é precisamente perto da superfície de trabalho, ainda que o espaço seja muitas vezes reduzido. Neste sentido, a Industrial Laborum projectou móveis inferiores, com várias dimensões standard, rentabilizando ao máximo a área de trabalho. Servem de apoio às bancadas, destinando-se ao armazenamento de material de uso permanente ou para arquivo activo.

Todos os móveis são projectados em particular, mas sempre integrados num sistema modular. Neste processo, são considerados, ainda, outros critérios:

- Máximo espaço útil de armazenamento;
- Superfícies de fácil limpeza e descontaminação;
- Máxima segurança;
- Maior mobilidade e adaptabilidade
- Resistência química, ao impacto e ao desgaste;
- Cuidado nos pormenores construtivos e nos acabamentos;
- Elevada estabilidade estrutural e dimensional;
- Protecção e/ou reforço dos pontos considerados frágeis.

Móveis com certificação **SEFA 8**, projetados e fabricados de acordo com as normas **EN 14056** - Mobiliário de Laboratório - Recomendações de Projeto e Instalação; **EN 14727** - Mobiliário de Laboratório - Unidades de Arrumação para Laboratório - Requisitos e Métodos de Teste.

PLAN DE TRAVAIL SUR MEUBLES

La hauteur des meubles inférieurs de laboratoire varie en fonction de la hauteur requise pour les paillasses. Le mobilier de laboratoire est utilisé pour stocker le matériel et les substances chimiques conformément à la norme EN 14727.

Un stockage et une organisation sûrs sont l'une des exigences les plus importantes d'un laboratoire. Et le meilleur emplacement pour cela est précisément à proximité de la surface de travail, même si l'espace est souvent réduit. En ce sens, Industrial Laborum a conçu des meubles inférieurs, avec plusieurs dimensions standard, maximisant l'espace de travail: ils servent de support aux paillasses, pour le stockage de matériel à usage permanent ou pour le classement actif.

Tous les meubles sont conçus en particulier, mais toujours intégrés dans un système modulaire. Dans ce processus, d'autres critères sont également pris en compte:

- Espace de stockage maximal;
- Surfaces faciles à nettoyer et à désinfecter;
- Sécurité maximale;
- Plus grande mobilité et adaptabilité
- Résistance chimique, impact et usure;
- Soin dans les détails constructifs et les finitions;
- Stabilité structurelle et dimensionnelle élevée;
- Protection et/ou renforcement des points fragiles.

Meubles certifiés **SEFA 8**, conçus et fabriqués conformément à la norme **EN 14056** - Mobilier de laboratoire - Recommandations de conception et d'installation; **EN 14727** - Mobilier de laboratoire - Unités de stockage pour laboratoire - Exigences et méthodes d'essai.

L2 WORKTOP ON CABINETS

TAMPO SOBRE MÓVEIS
PLAN DE TRAVAIL SUR MEUBLES

WORKTOP ON CABINETS

The Industrial Laborum presents the line of storage, worktop seating over cabinets with closed plinth. All modules are designed to seat at different heights desired by the utilizador, between 750mm and 900mm.

The base modules have different configurations, with 1 or 2 doors, with 1 door and 1 drawer, 2 doors and 2 drawers, 4 drawers, 3 drawers, with a swing door and corner modules.

All lines and modules can be integrally constructed in melamine facing particleboard, in steel sheet coated with epoxy-polyester resins or in stainless steel, as optional changes can be made to the front of the modules, which can be in compact laminate or with another material mentioned above. With good mechanical resistance, structural and dimensional stability, high resistance to corrosion, construction with imperceptible joints, and homogeneous surfaces to prevent the accumulation of contaminants and to facilitate cleaning.

TAMPO SOBRE MÓVEIS

A Industrial Laborum apresenta a linha de armazenamento, tampo assentes sobre móveis com rodapé fechado. Todos os módulos são projetados para assentarem nas diferentes alturas pretendidas pelo utilizador, entre 750mm e 900mm.

Os módulos inferiores apresentam diferentes configurações, com 1 ou 2 portas batentes, com 1 porta e 1 gaveta, 2 portas e 2 gavetas, de 4 gavetas, 3 gavetas, com porta basculante e módulos de canto.

Todas as linhas e módulos podem ser construídos integralmente em aglomerado revestido a melamina orleado a pvc, em chapa de aço revestida a resinas epóxi-políester ou em aço inoxidável, como opcional podem ser feitas alterações às frentes dos módulos, podendo ser em compacto fenólico ou combina com outro material acima referido. Com boa resistência mecânica e estabilidade estrutural e dimensional, elevada resistência à corrosão, construção com juntas imperceptíveis, e superfícies homogéneas para prevenir a acumulação de contaminantes e facilitar a limpeza.

PLAN DE TRAVAIL SUR MEUBLES

Industrial Laborum présente la ligne de rangement, surmontée de sièges sur des meubles à plinthe fermée. Tous les modules sont conçus pour s'asseoir à différentes hauteurs souhaitées par l'utilisateur, entre 750 mm et 900 mm.

Les modules inférieurs ont différentes configurations, avec 1 ou 2 portes, avec 1 porte et 1 tiroir, 2 portes et 2 tiroirs, 4 tiroirs, 3 tiroirs, avec porte battante et modules d'angle.

Toutes les lignes et tous les modules peuvent être intégralement construits en revêtement mélaminé revêtu de PVC, en tôle d'acier revêtue par proude de résines époxi-polyéster ou en acier inoxydable, des modifications pouvant être apportées à l'avant des modules, qui peuvent être en version phénolique compacte ou combinée, avec un autre matériau mentionné ci-dessus. Avec une bonne résistance mécanique et une stabilité structurelle et dimensionnelle, une résistance élevée à la corrosion, une construction avec des joints imperceptibles et des surfaces homogènes pour empêcher l'accumulation de contaminants et faciliter le nettoyage.
